OBJECTIVES OF THE COURSE:

This course attempts to provide a basic introduction to evolution of Law in India. Study of law relating to a particular country is not complete without understanding the history and development of the Laws and legal institutions. A student of law should be exposed to the ancient social order and religious philosophy as well as to the systems of dispute settlement mechanisms existing in those days. The medieval period had influence in the development of legal system. The advent of the British was an event, which also had its influence. The traditions of the past have made our modern legal system what it is, and still live on in it. Without a proper historical background, it may be difficult to appreciate as to why a particular feature of the system is as it is.

Concept of law is central to the legal enterprise. In the absence of a comprehensive understanding of this concept neither legal education nor legal practice can be set towards attaining justice in the society. Pedagogy is merely teaching of rules without the knowledge of cognitive and teleological foundations of the discipline and it would not be possible to present a synchronization of various statutes, cases, procedures, practices and customs in the form of a ‘systematic body of knowledge’ nor it would be possible to show the interconnectivity among various branches of law.
